## Fluency

## Say the Word

1. Have students look at the student page. **We will practice reading words we already know.** Choose a student to select a word from the page. **Let's sound out the word, then say the sounds fast.** As you say the sounds fast, sweep your finger under the word. **The word is am** (for example).
2. Select one student at a time to choose a word. Use the procedures above to sound out and read the word together. Once students have sounded out and read several words, allow for individual responses.
